

TANAX TRUCKS, Joint Stock Company, traditional producer of mechanical engineering products takes opportunity for offering following production facilities for custom manufacturing, which are certified under ISO 9001.

WE OFFER:

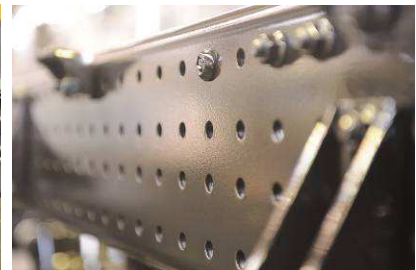

- **Turning operations** by centre lathes - in diameter up to 600 mm, in length up to 2500 mm
- **Milling operations** by horizontal boring and milling machines (milling, precise boring) in diameter up to 3000 x 1500 x 8000mm
- **Grinding operations** by cylindrical grinding machines - in diameter up to 400 mm, length 2000mm
- **Grinding operations** by surface grinding machines - width 200, length 1200mm

- **Machining by CNC** machining centres for non rotary parts with clamping position of table 850 x 1000 mm
- **Material cutting** by frame saws, and saws and circular saws up to diameter 400 mm
- **Plate cutting** by table sheers up to dimensions 25 x 3150mm

- **Plate bending** by bending machines in dimensions up to 6 x 2000mm
- **Shape plasma cutting** of plates in thickness from 3mm up to 15mm, in dimensions 4000 x 1500mm
- **Mounting** of subassemblies, components and complete vehicles
- **Locksmith operations**
- **Welding** by MIG, MAG technology
- **Planing** to dimension 1200 x 1500mm
- **Groove sloting** up to 15mm wide and 120mm long

----- **Our tradition / obligation for future!** -----
